How to Publish and Share Your AI Coach

(Installation Guide for LMS and Web Use)

Powered by AIReady Studio – Artha Learning Inc.

 **Welcome!**

You've built your custom AI Coach in AIReady Studio — amazing work! Now let's get your AI Coach into the hands (and screens) of your learners. This guide will walk you through how to publish and share your downloaded packages: SCORM 1.2, SCORM 2004, HTML5 (Storyline-style), or a single HTML file.

Option 1: Publishing to Your LMS (SCORM 1.2 or 2004)

Use this if you downloaded a .zip SCORM file.

Steps:

1. **Log in to your LMS**
 - Navigate to your admin or course creator dashboard.
2. **Create or Open a Course**
 - Choose the course where you want to embed your AI Coach.
3. **Upload the ZIP Package**
 - Look for an option like “Add Activity” → “SCORM Package.”
 - Upload the .zip file **as-is**. Do not unzip.
4. **Configure Settings**
 - Set completion tracking, grading, number of attempts as needed.
 - Enable JavaScript or external scripts (if prompted).
5. **Save and Launch**
 - Save your activity and **test in learner view** — not preview mode.

 *AI functionality needs a live environment to work fully — preview modes often block JavaScript.*

Option 2: Hosting a HTML5 Package

Use this if you downloaded a HTML5 package with templated design.

Steps:

1. Unzip the Folder

- Locate and unzip your .zip file locally.
- Look for story.html — this is your main file.

2. Upload Entire Folder

- Upload the full folder to your web server.

3. Launch or Embed

- Share the link:
`https://yourdomain.com/ai-coach-folder/story.html`
- Or embed as iframe (see above).

Option 3: Publishing on a Website (Single HTML File)

Use this if you downloaded a single .html file.

Steps:

1. Access Your Hosting Panel

- Use FTP (like FileZilla), cPanel, or a site builder (e.g. WordPress).

2. Upload the HTML File

- Upload your AI Coach .html file to the appropriate directory.

3. Link to It

- Add a hyperlink or button on your website:

```
<a href="https://yourdomain.com/ai-coach.html" target="_blank">Launch  
AI Coach</a>
```

4. Embed (Optional)

- You can also embed it with:

```
<iframe src="https://yourdomain.com/ai-coach.html" width="100%" height="600px"></iframe>
```

Troubleshooting & Pro Tips

? Issue	☑ What to Do
AI not responding	Check if your LMS or browser is blocking JavaScript
Doesn't load in LMS	Publish the module and test in learner/live view
Coach loads but doesn't respond	Ensure AIReady API key is valid and internet is stable
Need advanced embedding (e.g., inside iFrames or pop-ups)?	Contact your webmaster or LMS administrator.
